

Making Children's Ideas come to Life

Each child had a chance to work with a teacher to make their ideas come to life. After each child had come up with an idea for their project, researched it, created their list of materials needed and their plan for how to make their project, they got to work with a teacher to make their project. The children all had many different ideas on what they wanted to make. The teachers helped the children stick to their plans and follow the steps to put their project together. The children chose the types of fabric they wanted to use, traced patterns, cut out fabric and helped the teacher use the sewing machine to put their piece together.

Standards

- Explores objects and materials.
- Describes, compares, sorts, and orders.
- Records observations.
