

Under the Microscope

To help the children get a better look at fabrics, we put out microscopes for the children to use with fabric swatches. The children observed the different patterns and shapes that the fabric is made of. The children worked to draw what they saw under the microscope. The children drew squares and lines to represent the fabric magnified.

Standards

- Recognizes simple patterns.
- Understands and names shapes.
- Creates shapes.
- Explores materials.
- Makes observations.
- Records observations.
- Identify patterns.
- Recognizes properties of materials.
- Uses language to share observations.
- Uses writing for a variety of purposes.
- Seeks new experiences.
