

During cooking activities, many opportunities for fine motor development are provided. In these photos, children work together to make PANCAKES.

1. SCOOPING in order to measure ingredients.

2. MIXING ingredients together to make batter.

3. POURING batter mix onto the hot griddle.

4. FLIPPING pancakes and putting them on a plate as they are done cooking.

5. USING PINCER GRASP and hand/eye coordination, children use their fingers to eat the delicious pancakes that they made. Yummy!
