

Beaks and Feet (2)

Refrain: Big birds and small birds have beaks and feet,
their beaks are large and small Cause of what they eat.

Some use their beaks to catch their food and
some use their feet for swimming.

Now stand on one foot like an Heron does.

Pick up the worms with your beak like a robin does.

Catch the mice with your feet like an owl does.

Ducks and penguins use their feet for swimming.

Refrain
