

## Living Things (6)

All living things need air, food, and water,  
All living things need them to grow.  
Ooh a butterfly it starts from a little egg,  
And it just grows and grows,  
And it just grows and grows.

A butterfly starts as an egg.  
The egg turns into a caterpillar.  
The caterpillar turns into a chrysalis,  
Which becomes a butterfly.

**Repeat 2x:** A butterfly, a butterfly, fly like a butterfly.

All living things need air food, and water,  
All living things need them to grow.  
Ooh a frog starts as an egg,  
And it just grows and grows.  
And it just grows and grows.

The frog starts as an egg,  
The egg turns into a tadpole,  
The tadpole turns into a froglet,  
Which becomes, becomes a frog.

**Repeat 2x:** Hop like a frog, hop like a frog.  
Hop just like, just like, a frog.

All living things need air, food, and water.  
All living things need them to grow,  
Oh, butterflies and frogs they start as a little egg,  
And they just grow and grow.  
And they just grow and grow.
