

Weather

Exploring nature with toddlers provided for learning in all areas of development. Young children explore through their senses and are very aware of the environment around them. Exploration of the natural world provides opportunities to introduce new vocabulary, enhance observation skills, encourage natural math and science concepts, incorporate literacy, and bring about an awareness of caring for our earth.

Ohio Early Learning
Awareness &
feelings through
Attachment: The child
of nurturing and
Peer Interactions &
and forth interactions

and Developmental Standards: Topic:
Expression of Emotion: The child will express
facial expressions, gestures and sounds.
will explore environment while in the presence
familiar adults.
Relationships : The child will participate in back
with peers.
